

EXPANSION JOINTS FOR CERAMIC FLOORS

Expansion joints made of plastic material and a layer of silicone to absorb small movements.

These joints are used for fractioning large surface floors, to prevent tile loosening or breakage and to ensure an impeccable border finish over time.

They are available in pieces of 2 meters in length and 8 millimeters in width with variable heights.

Grey color.

PRODUCT	LENGTH M	WIDTH MM	HEIGHT MM	M/PACKAGE	PIECES/PACKAGE
EXPANSION JOINTS 8 X 8	2	8	8	100	50
EXPANSION JOINTS 10 X 8	2	8	10	100	50
EXPANSION JOINTS 12 X 8	2	8	12	100	50
EXPANSION JOINTS 14 X 8	2	8	14	100	50
EXPANSION JOINTS 16 X 8	2	8	16	100	50

EXPANSION JOINTS FOR SCREED

Expansion joints made of plastic material and a layer of silicone to absorb small movements.

These expansion joints are used for fractioning large surface screed to prevent the formation of cracks and breakage during plastic shrinkage.

They are available in pieces of 2,5 meters in length and 8 millimeters in width with variable heights.

Grey color.
