

ABRASIVE PADS

With their combined action they eliminate unsightly marks of surface corrosion from polished marble surfaces.

Technical features

Synthetic sponge pad with diamond dust abrasive part.
 White pad to use first to remove the stain,
 Blue pad to use second to smooth the surface,
 Orange pad for polishing the surface.

Use

Wet the stained area with water and rub with the white abrasive pad, making circular movements for about 1 minute, wetting the surface again if necessary.

Rinse with water and check to see if the stain has disappeared, if not, repeat the operations.

The surface must be opaque, smooth and even.

Repeat the same operation with the blue pad for 1 minute, taking care to keep the surface damp.

After this operation, the treated area will be less opaque than before.

Then take the orange abrasive pad and rub for 1-2 minutes, keeping the marble surface damp then rinse thoroughly with water.

Warning

Wear latex gloves.

Keep out of reach of children.
