

PREMIXED MORTARS FOR SCREED

Regulation EN 13813

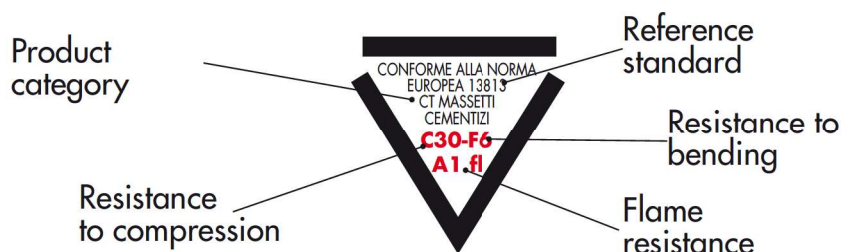

This regulation establishes the test criteria and methods for the classification of premixed mortars for screed

- CT** = Premixed mortars for cement screed. Cement-based premixed powder to be mixed with water at the moment of use in the construction site.

- C** = Compression strength after 28 days (N/mm²)

- F** = Flexural strength after 28 days (N/mm²)

- A1 fl** = Flame resistant

CPR 305/2011

This regulation establishes (among other things) that minimum test requirements for premixed mortars for screed provided by the regulation EN 13813, and that raw materials, production processes and finished products are subject to a control plan with defined periodical testing.
